Scality RING & Rubrik
Cloud Data Management

Today's digital economy is challenged to manage the exponential growth of data. Enterprises demand that data is always available no matter what disaster occurs. A policy-driven backup, instant recovery, replication, and archive solution that delivers simplicity, unlimited scale, data integrity, and speed is required to meet the critical needs of the digital business.

Scality and Rubrik have partnered to build an enterprise data management Solution that exceeds your organization's automated backup and recovery expectations. By combining Rubrik's world-class unified data orchestration, catalog management, and deduplicated storage into a single scale-out fabric with Scality's award-winning RING software-defined object storage, you get unlimited linear scale, 14x9s of durability and a lower TCO without being locked into proprietary hardware platforms.

Scality RING is Rubrik-certified and designed to meet the largest and most demanding data center environments by delivering breakthrough capabilities for

virtualized and physical systems that go well beyond what traditional backup practices can achieve. The integrated solution provides end-to-end data management from backup to replication to archival. It preserves your data easy, allows for instant access and support automated policies to lower TCO. With support for private or public cloud, you can choose where you want the data stored. Using Scality RING to manage the data archive for Rubrik unlocks a level of scale, performance and durability at a TCO that tape- and NAS-based targets can only dream of. Integrated with Amazon AWS S3, Scality and Rubrik provide an ideal solution for your data, either on-premises or in the cloud.

Key benefits

Lower cost
Scality + Rubrik offer worry-free expansion while reducing TCO by up to 90%. You can now seamlessly leverage standard service (and those supply agreements) to reduce infrastructure and maintenance costs — and for rapid scaling to meet backup and recovery infrastructure requirements. Automatic rebalancing and self-healing enable efficient, cost-effective capacity expansion and server replacement for better lifecycle management.
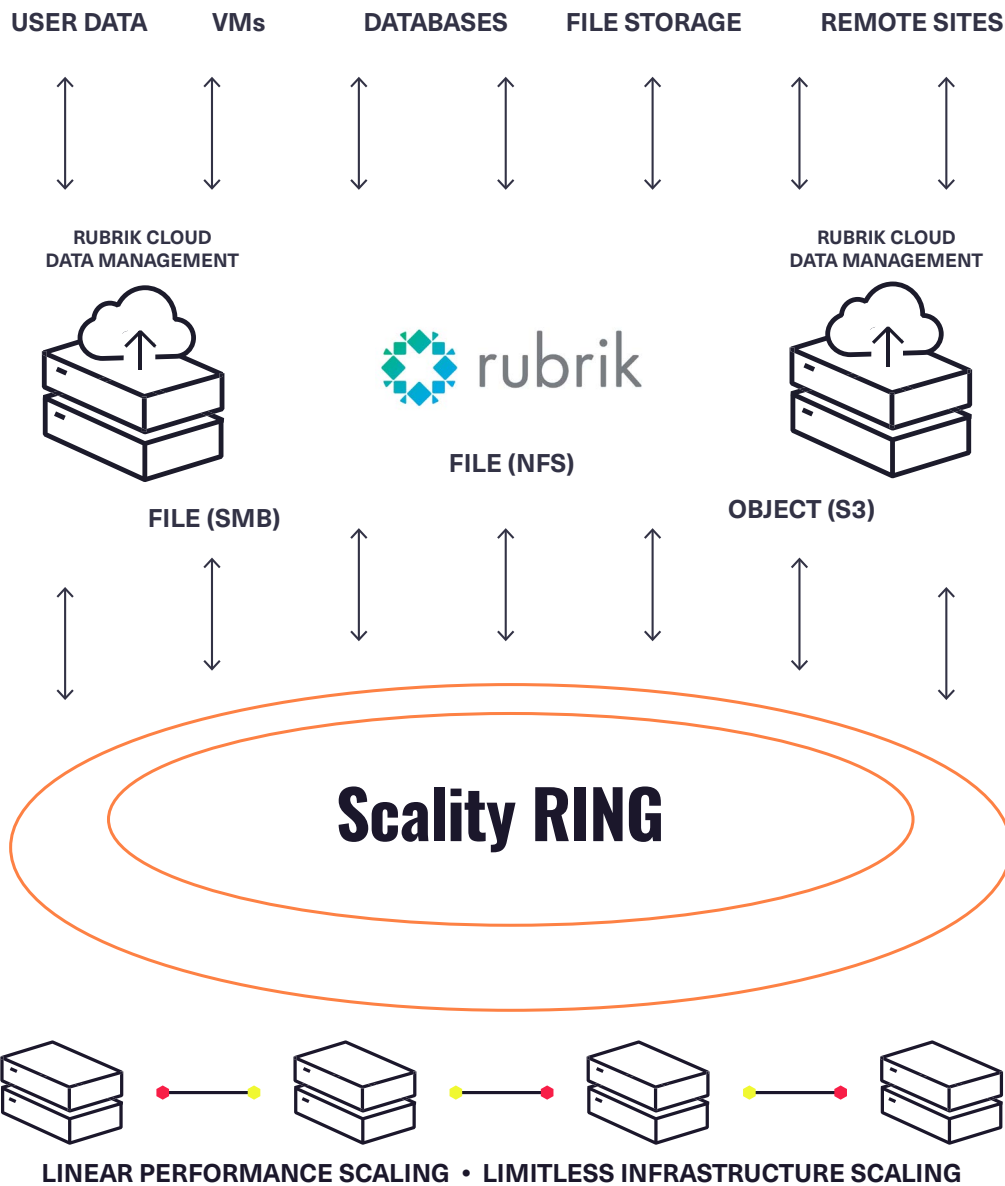

Safer data
Enterprises demand data durability in the 14x9s with intuitive management. This combined solution meets demands while significantly increasing data recovery times as compared to traditional systems. Extreme fault tolerance with geo-distributed deployment and protection policies (replication or erasure coding) take protection to another level. Rubrik + Scality take advantage of the S3 protocol to enable security and access control.

Faster recovery
Unlike conventional NAS or tape-based storage, Scality + Rubrik enable high density hard drive recovery instantly, not days, reducing backup windows and restore times. Eliminate tape management overhead (monitoring, job schedules, off-site access, time to restore, and data search), and enable complete paral-lelism & scale-out storage. Throughput scales linearly across mixed workloads without degrading the per-formance eliminating complex time-intensive data management.

Perfect fit
A safe, fast, affordable backup solution can alleviate a massive amount of pressure put on digital businesses. With the combination of Rubrik and Scality, you get the same backup and recovery trusted in the world's largest and most complex heterogeneous environments. Mutual certification ensures you aren't chasing vendors. Whatever the fit, we've got you covered.

ABOUT RUBRIK Trusted by the world's leading companies and industry-leading partners, Rubrik helps enterprises achieve data control to drive business resiliency, cloud mobility, and regulatory compliance. For more information, visit www.rubrik.com and follow @rubrikInc on Twitter.

ABOUT SCALITY Scality® storage propels companies to unify data management no matter where data lives — from edge to core to cloud. Our market-leading file and object storage software protects data on-premises and in hybrid and multi-cloud environments. With RING and ARTESCA, Scality's approach to managing data across the enterprise accelerates business insight for sound decision-making and maximum return on investment. To compete in a data-driven economy, IT leaders and application developers trust Scality to build sustainable, adaptable solutions. Scality is recognized as a leader by Gartner and IDC.
