

Scality Certified Architect Training

Get the knowledge you need to excel with Scality solutions

Ready to gain a competitive edge? Become a Scality Certified Architect (SCA).

Our comprehensive SCA training program helps technical pre-sales partners master how to position Scality RING & ARTESCA to customers, while effectively qualifying their needs and solving their data-related challenges.

What you'll learn

Across two 3h online training sessions, you'll learn how to confidently qualify customer needs and design data storage solutions with Scality RING and ARTESCA. You'll gain an understanding of how to size the right amount of servers and storage required to formalize a final proposal, as well as how to outline and build Scality-certified ISVs into the solution.

During the first session, we'll delve into ARTESCA. In the second, we'll cover RING. Join the sessions that interest you — no requirement to attend both days.

Agenda highlights

- Scality introduction
- Data challenges & Scality positioning
- ARTESCA & RING use cases and ISV solutions
- ARTESCA & RING technical deep-dives
- Live product demonstrations
- How to size and what information is required
- Resources and ongoing support

Key market drivers

affecting the storage industry

Technologies

that power software-based and scale-out storage systems

Use cases

for software-defined storage

Solutions

to meet your customers' business and tech requirements

Training in 4 languages is offered live and on-demand each quarter. Visit the Scality partner portal to sign up, and find an array of regularly updated content in our asset library.
